

Partnership in cooperation.
Competence in execution.

About us

We have been providing professional services and carrying out specialised projects in the area of surface protection, insulation, interiors and furniture for almost 25 years. Our work culture is based on trust, partnership, and reliability. We try to transfer these values on relationships with our clients. What we understand by loyal cooperation is joint effort and focus on achieving the goal.

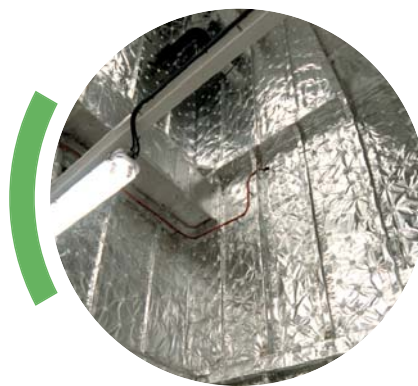

In our services we particularly take care of our customers' good and success of the projects realised for them. Each project is approached individually and comprehensively. We believe that a real ability to listen to customers' needs, their thorough understanding, and effective communication are the guarantee of a successful cooperation and a deliberate method of execution

and monitoring the activities in progress bring expected and measurable results. The whole process is based on people – a team of qualified experts who support customers at every stage of the project.

We do not fear challenges which is proved in our portfolio where you can find unusual projects requiring multifaceted approach, specialized experience, and precision in using the newest technology. We are distinguished by deliberate system of executions. Projects are always realised on time, according to the needs and requirements of the investment, with full documentation, and within assumed budget. This approach results in realisations of perfect quality, full satisfaction of partners, as well as long-term cooperation.

Safety and environment

FAST is a brand of true values, aware of its responsibility for people and the environment. We are concerned about the work environment therefore we care about our employees and business partners in each area of our activity.

We accurately adhere to the standards and requirements of the Occupational Safety and Health Management System PN-N- 18001. For many years we have been consistently implementing the environmental policy which culminated in the introduction of the Environmental Management System based on ISO 14001. Thanks to this system we are able to minimize the risks for the environment and we also develop environmental awareness among our employees.

Brand with certificate

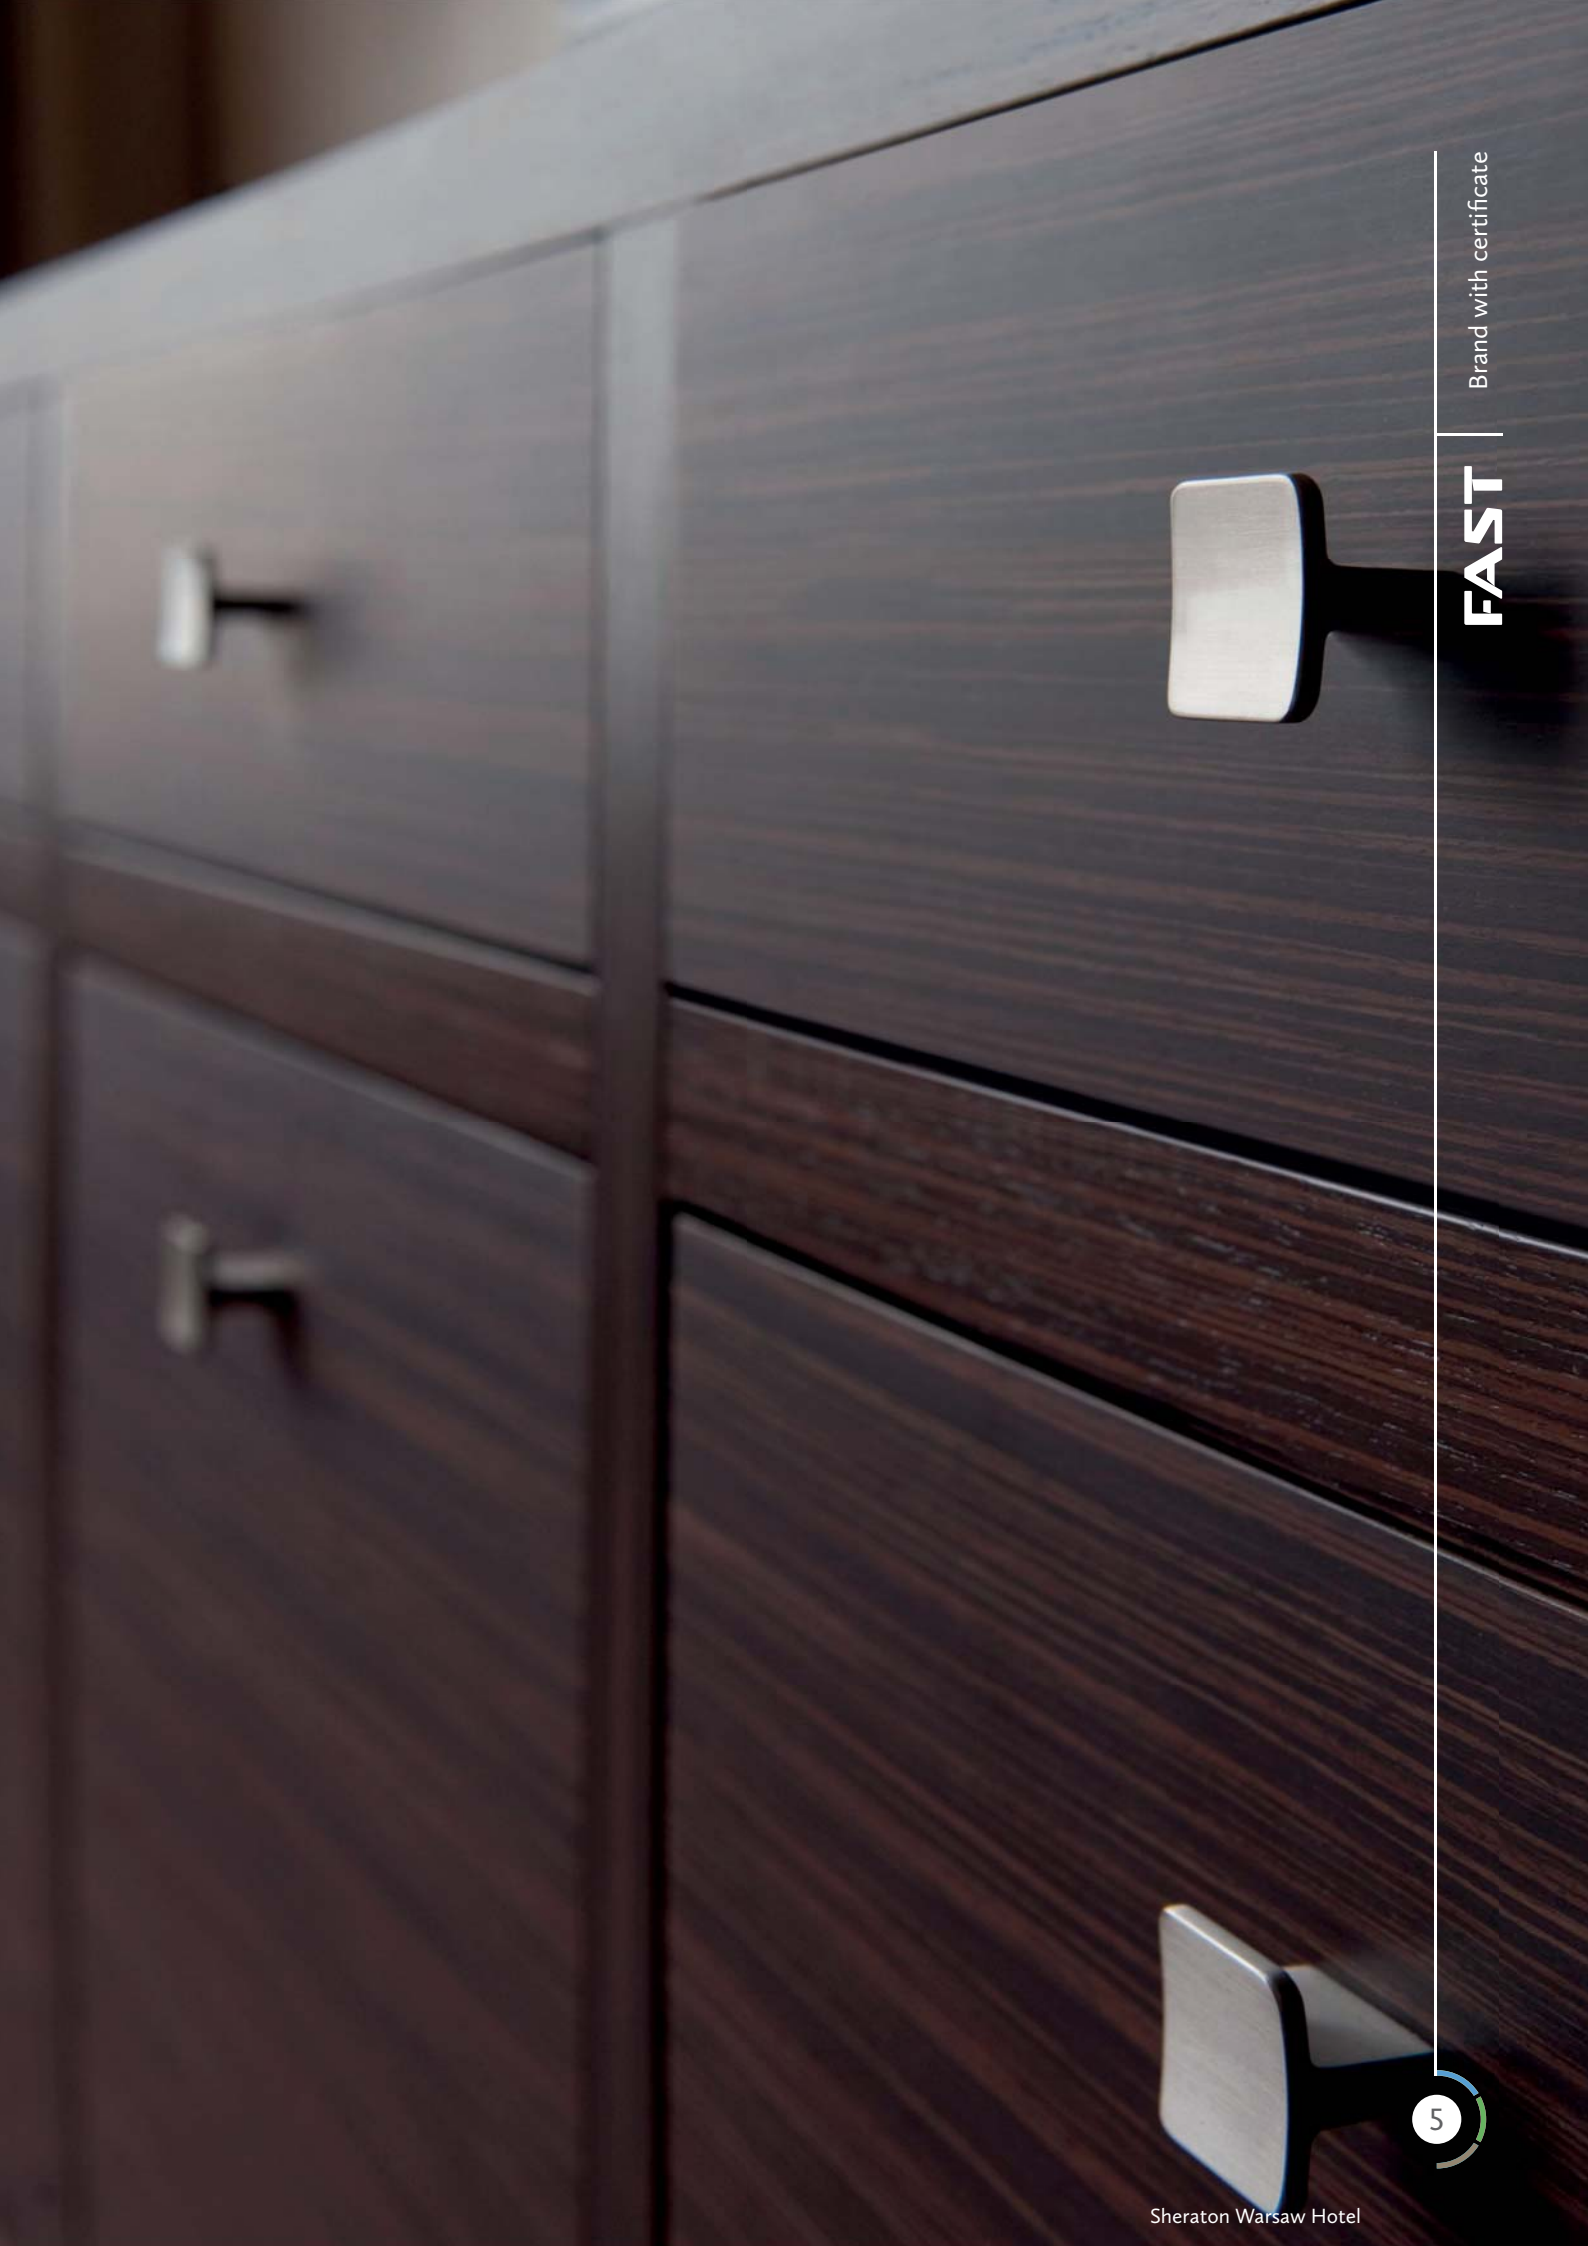

One of the distinguishing elements of FAST is high quality of realised projects. We have implemented, continuously develop, and improve the Integrated Management System including ISO 9001, ISO 14001, and PN-N-18001 which builds in our customers confidence and guarantees service with constant quality. We are currently undergoing the process of the management system certification to comply with the NATO standardization documents AQAP 2110:2009.

The assumptions of quality policy are consistent with the principles of the company. A comprehensive approach which aims at high quality, safety, and environmental protection is fulfilled by every employee. We think that the culture of safe work and cooperation with FAST does not equal only a conscious observance of safety procedures. The overall objective of our

business is profit which establishes an adequate level of stability which in turn ensures our employees and partners safety and comfort of cooperation. According to the Integrated Management System, we adhere to specific requirements concerning the development of the production process. We fulfil the highest standards and technical requirements, both within marine projects and interior area.

Our employees, owing to their skills and long-term experience, are fundamental in each activity. We constantly invest in trainings and development of their competences and skills. NORSOK m-501 certificate proves that we meet stringent requirements with respect to maintenance works carried out on offshore structures. We create comprehensive documentation for every project in accordance with Classification Societies' norms. FAST staff, executing offshore projects, possesses certificates which entitle to conduct anticorrosion works on ballast tanks under the supervision of the PSPC, and on vessels in accordance with IMO SOLAS resolution.

Brand with certificate

FAST

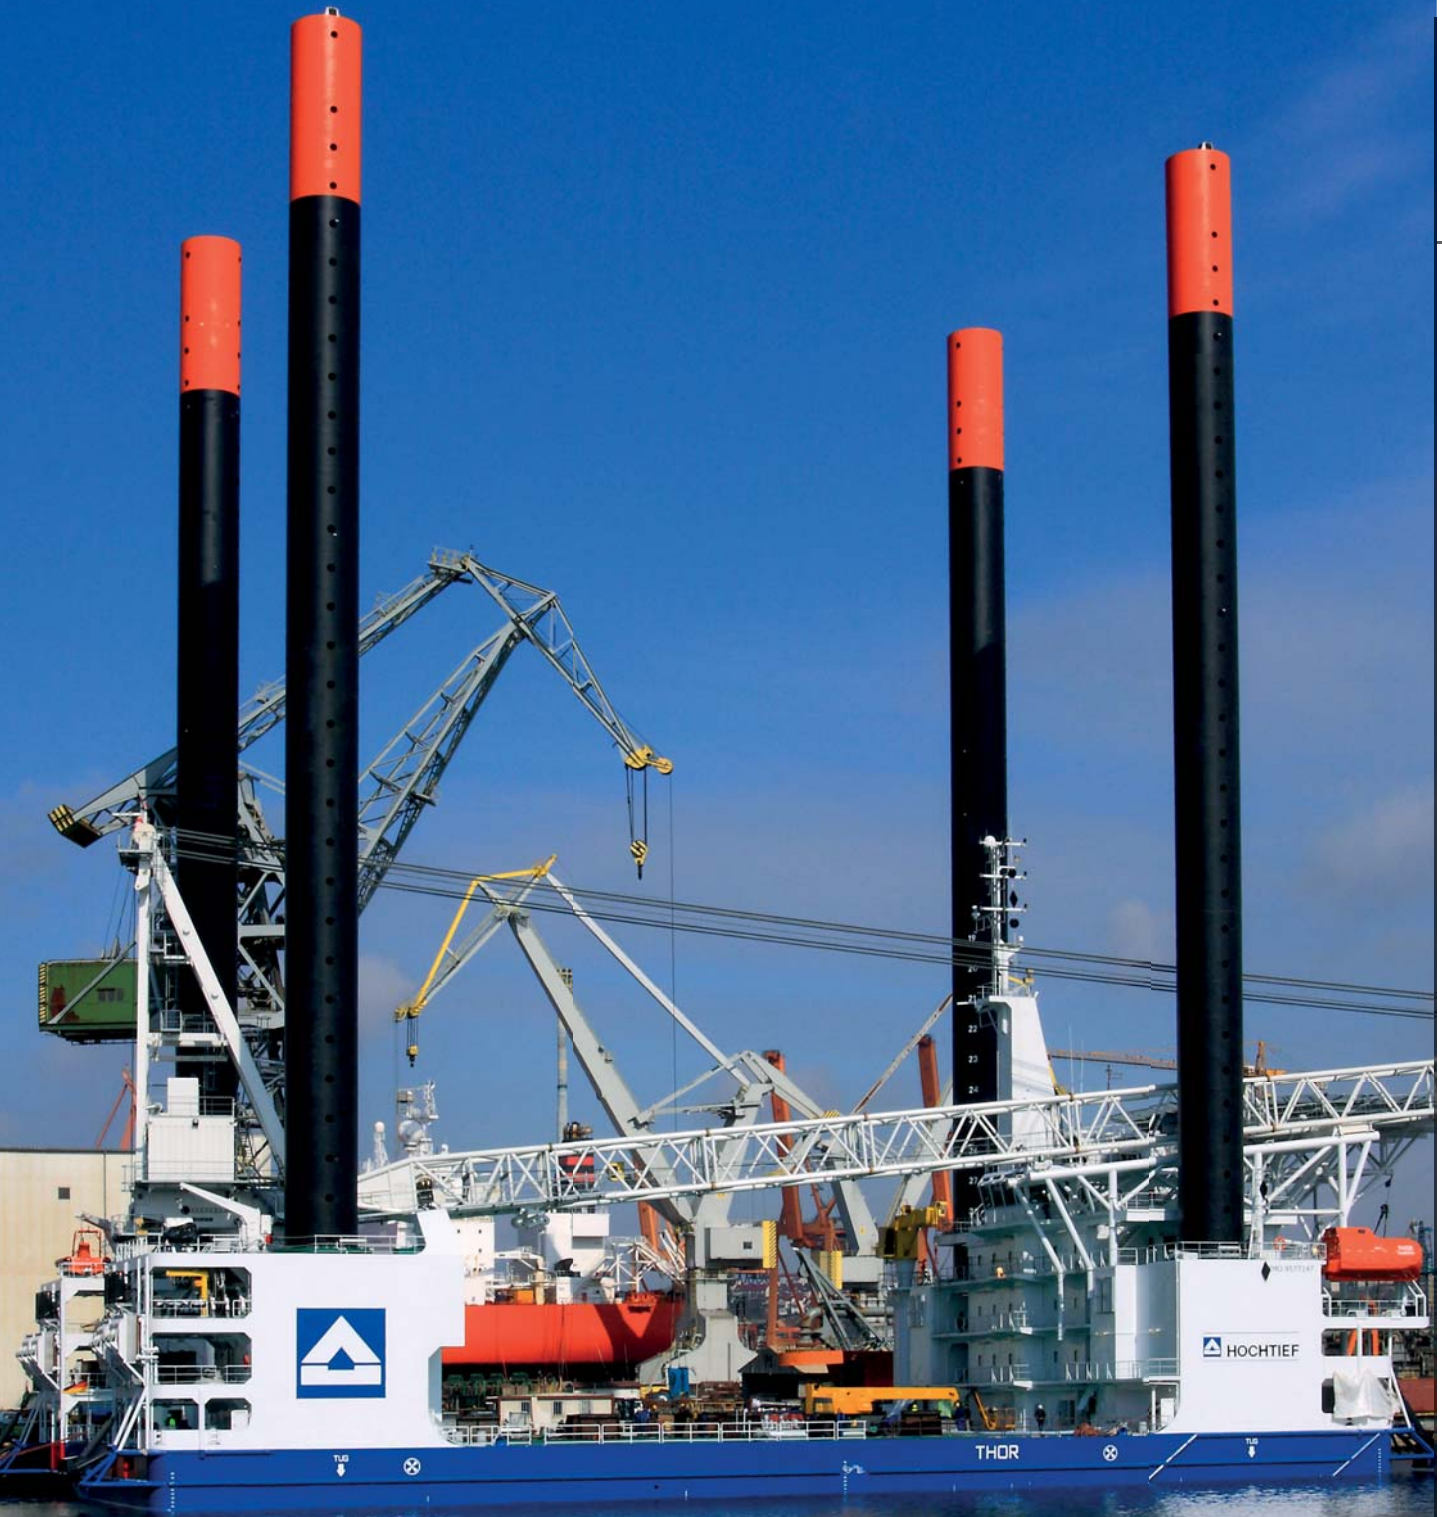

Areas of activity

FAST provides specialist services in the area of surface protection, insulation, interiors and furniture. We offer technical solutions and high quality production, as well as support and advice at every stage of implementation. The scope of the projects is adjusted to individual needs and requirements. We can conduct works in all areas simultaneously on a single object or carry out independent works separately for each area.

Within the area of surface protection and insulation we provide services for shipbuilding industry, energy industry and construction industry. Within the area of interiors and furniture we supply hotels, ships and commercial spaces.

FAST projects are carried out by the experts certified by the International Project Management Association (IPMA) – experienced field specialists who monitor every stage of the project in order to ensure best quality of executive processes.

Efficient implementation of projects takes place on the basis of regular analysis of the projects, anticipating potential risks and minimizing them. In order to improve the quality of our services, we take advantage of experience and good practices from various areas of our activity.

Surface protection

ADVANCED SOLUTIONS FOR SURFACE PROTECTION

Maintenance and painting services in the area of surface protection are the main activities of FAST. Due to many years of experience, qualified staff, as well as full technical infrastructure we can realise a great variety of projects.

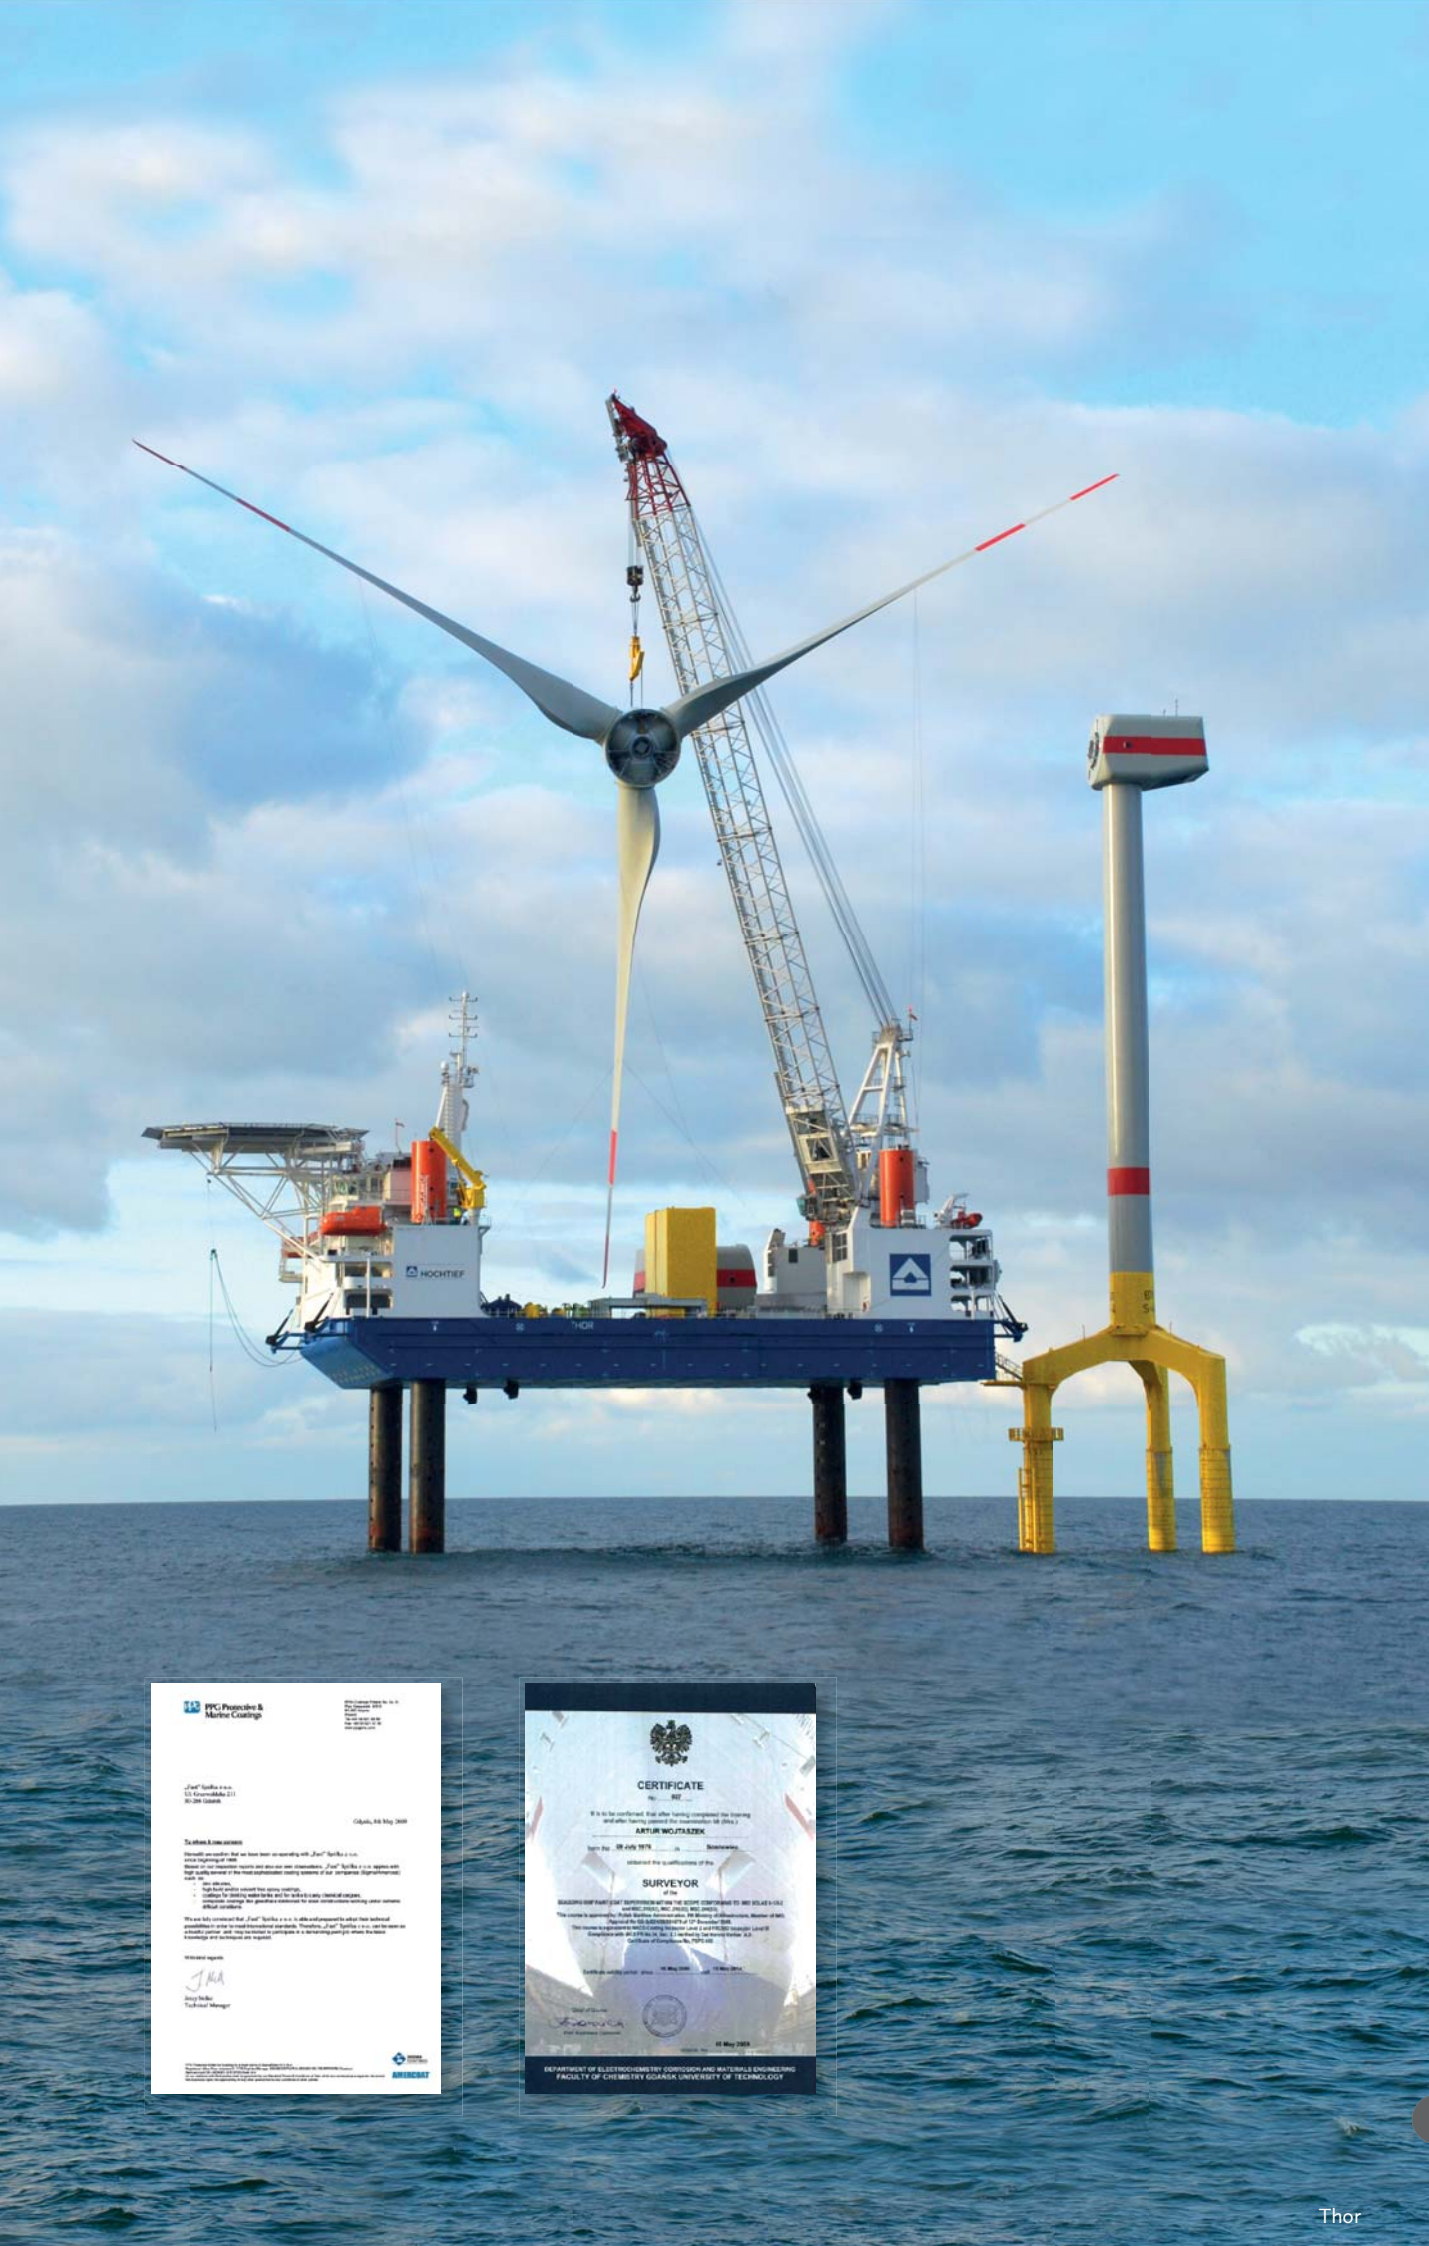

Our services are comprehensive: from an in-depth technical analysis, through preparatory works to the application of optimal method of cleaning and adequate painting and metallizing system. We carefully monitor each step of the order and we watch over the proper course of all works. Excellent logistics of the project – both in individual stages, and between them – together with constant forecasting and minimizing potential risks result in high quality and timeliness of the project implementation.

Surface protection works (cleaning and painting) are carried out in our own painting lines or in the place designated by the customer where we also provide a complete facility protection against adverse weather conditions.

The works are carried out in accordance with the standards and under the supervision of Classification Societies. We meet all the requirements and norm recommendations which come from the manufacturers and classifiers.

This area of activity includes: new vessels, ship repairs and reconstructions, offshore structures, and large-size steel structures.

SURFACE PROTECTION

New vessels

SPECIALISATION IN SURFACE PROTECTION

Vessels must fulfil their function for many years complying with strict standards. Therefore, they must be solidly protected. For this purpose, an anti-corrosion coating is applied on the properly prepared substrate taking into account all the specific technological requirements concerning new vessel exploitation. We use the method of metal spraying applied on the steel in the outer areas, cargo holds, and inner parts; and Ecospeed paint which is applied in high-temperature and does not require docking.

We are glad to have a good reputation of specialist in the maintenance of fresh water tanks (FWT) and water ballast tanks (WBT), and other tanks of special purpose. Preservation works are carried out in accordance with the requirements of Classification Societies (PSPC) and under the IMO resolution. For each tank we prepare comprehensive documentation. We preserve various units, from small through large vessels, to huge floating objects.

SURFACE PROTECTION

Ship repairs and reconstructions

QUALITY AND ACCURACY OF EXECUTION COMPATIBLE WITH THE PROJECT SPECIFICATION

Surface protection projects within ship repairs and reconstructions require a thorough cleaning of preserved areas and professional renewal of protective coatings. The quality of these processes has a great impact on the further life expectancy of the surfaces. Due to their specification, the majority

of repairs and reconstructions, including whole range of maintenance repairs, are carried out in docks. Owing to developed technical infrastructure, adequate materials, and qualified staff, we provide complete anticorrosion and equipment repairs. All the works are always conducted in compliance with the specifications of the project and with highest care and quality.

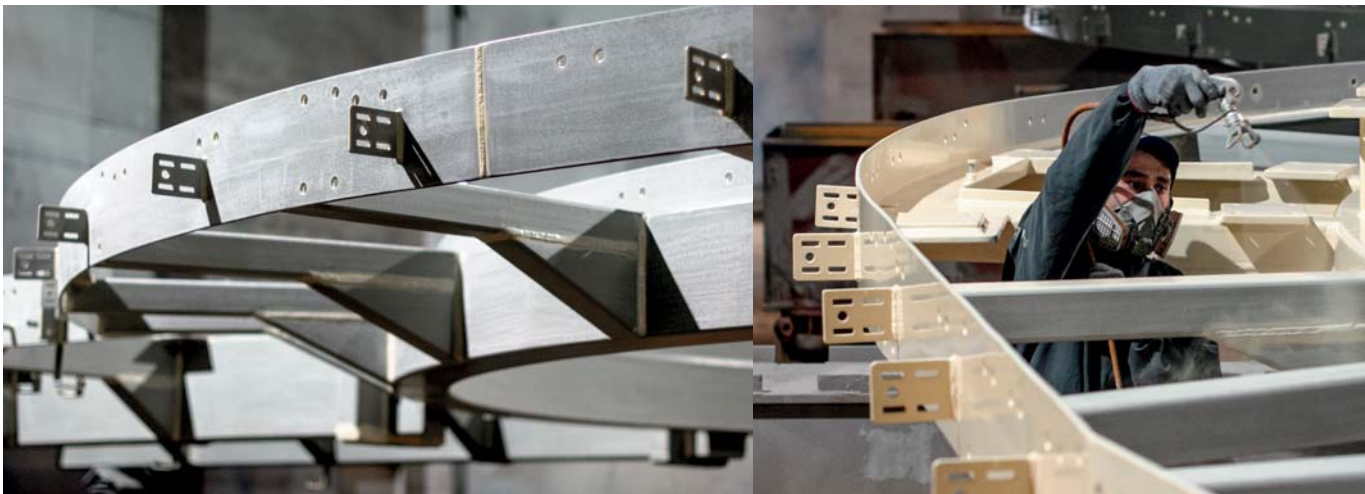

SURFACE PROTECTION

Offshore

MOST DEMANDING CONSTRUCTIONS

Offshore structures belong to the most demanding and their preservation projects to the most complex. FAST preserves specialized units or components dedicated for petroleum industry and wind power industry. We carry out complex projects for setting wind towers and drilling platforms. Their complexity and multidimensional nature require special care and commitment which is reflected in one of our projects, namely platforms for wind towers with openwork structure which are characterised by particularly rigorous requirements.

We possess necessary certificates such as NORSOK m-51 authorising the surface protection of offshore structures. The projects are always executed according to customer's requirements. During the realisation of projects we establish partnership relations between the clients and partners thanks to which the cooperation is constructive and produces expected results.

FAST

SURFACE PROTECTION

Large steel constructions

INDIVIDUAL APPROACH TO IMPLEMENTATION

Surface protection of large steel structures requires experience, skills, and properly matched paint systems. Comprehensive and professional works in the area of preservation guarantee long-term and safe functioning of such constructions. We apply standard

or more advanced solutions depending on the clients' expectations. Regardless of whether we secure the elements of public facility roof structure, turbine or bridge spans, each project is analysed and realised individually according to its purpose.

Insulation

SAFE AND DURABLE INSULATION SOLUTIONS

Shipyards industry has to meet extremely high requirements regarding safety and comfort of the vessels. Therefore the materials and insulation solutions we use play such a crucial role in providing durability, resistance and convenience in utilizing the ships. As a result, all constructions have to be sufficiently prepared for proper application of the insulation.

Well-designed and properly installed protection is a prerequisite for the effective execution of all processes and ensures optimal work of the entire installation.

Our company provides extensive insulation services for sea constructions, offshore, and industrial applications. We insulate flat surfaces, pipelines and flues, in the area of thermal, fire and acoustic preservation. In order to meet the most stringent requirements, we offer energy efficient, safe and sustainable solutions for fire protection. Moreover, the solutions we offer ensure acoustic and thermal insulation not only on the vessels but also on other facilities we develop.

We cooperate with suppliers of the best insulating materials. For each project we prepare an in-depth technical documentation. This is another area in which you can rely on our expertise and efficiency.

We provide a full range of insulation services for marine and offshore structures, and industrial applications.

Insulation

FAST

Interiors & Furniture

INDIVIDUAL REALISATION AND PRECISION IN SUPPLYING EVERY INTERIOR

FAST offer is tailored to customer's individual needs. We remember what is most important. Along with superior execution, the interior must be functional and have its unique personality conditioned by its purpose and design goals. We value phase work which improves communication with our customers who know exactly what to expect at every stage. Having more than twenty years of experience we became specialised in supplying various types of interiors. We comprehensively equip and finish ships, hotels, and commercial spaces.

We are distinguished by individual approach to each and every project as well as by precision and aesthetic values. We cooperate with manufacturers which provide products of leading brands. Smart functionality, customized solutions, and the ability to process different materials enable us to undertake non-standard projects. Our interiors are known for their elegance, uniqueness, and excellent design.

Our customers exactly
know what to expect at every stage.

We pay special attention to furniture production. We have our own manufacturing plant and state-of-the-art machinery stock. Among our undeniable assets are: wide range of raw materials, advanced enamel technologies with the ability to obtain deep matte with high gloss, trusty methods of bending, ability to create asymmetrical forms and combining different materials, precision, and aesthetic finishing. The combination of modern technologies with openness for clients' needs and flexible production adjustments bring fruitful effects which we are proud of.

We are eager to share our knowledge. We advise trying to be guides in the multitude of offers available in the market. We also give a helping hand during the selection of optimal solutions. Trusty installation and service crews are available at clients' disposal for the time of installation. Our professionals have extensive experience, keep appointments, and take care of the details. In addition, we also provide a full range of finishing.

INTERIORS & FURNITURE

Hotels

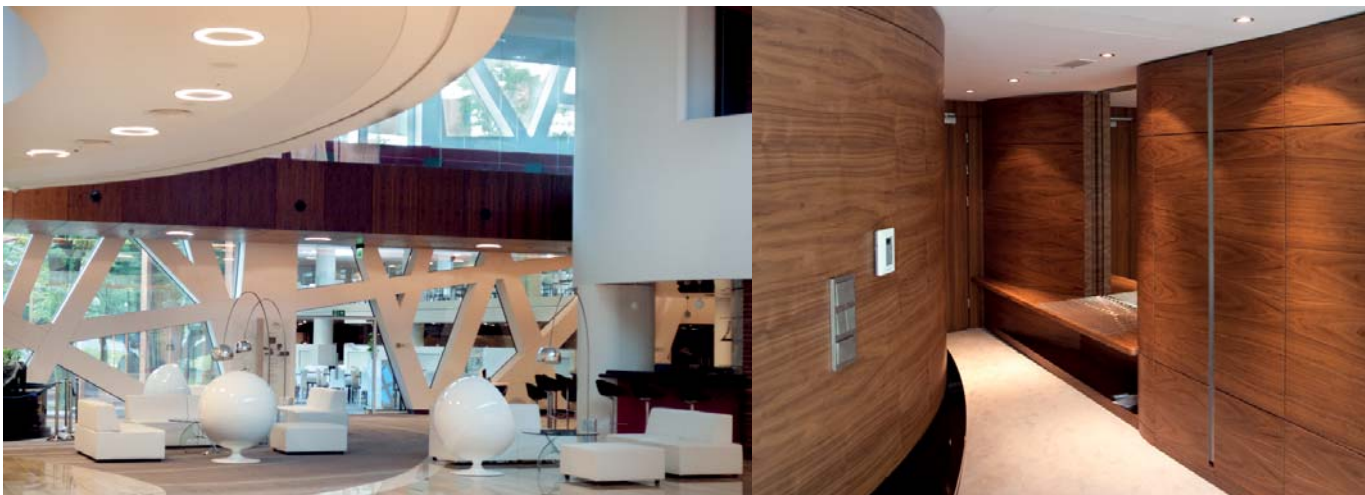

LUXURY AND COMFORT OF REST

We value quality, sublime style, and individuality of our clients. We understand their needs and sophisticated aesthetics. We make every effort to ensure that visitors of the hotels we equipped feel comfortable. Therefore, when implementing the ideas of individual clients, we pay attention to every detail of the conception. The concepts are analysed in a broad perspective in order

not to violate their originality even in the smallest degree. We combine the uniqueness of the concept with the precision of implementation and user's convenience. We are not afraid of challenges even when they concern highest possible standards. We equip the best facilities in the whole world.

Hotels which have already trusted FAST: the World Wide Hotels, Small Luxury Hotels, Sheraton Hotels, Fair Play Hotels, Crown Plaza, Marine Hotel, Narvil Hotel.
