„FAST” SA  
Ul. Grunwaldzka 211  
80-266 Gdańsk

Gdańsk, 30th July 2012

### To whom it may concern

Herewith we confirm that we have been co-operating with „FAST” SA since beginning of 2010 on IMO PSPC project build in 'Crist' S/Y.

Based on our inspection reports and also our own observations, „FAST” SA applies with high quality several of the most sophisticated coating systems of our company (International Paint) such as:

- Zinc epoxy,
- High build and/or solvent free epoxy coatings,
- Antifouling coatings
- Coatings for drinking water tanks, for water ballast tanks, for cofferdams and for voids.

We are fully convinced that „FAST” SA is able and prepared to adopt their technical possibilities in order to meet international standards. Therefore, „FAST” SA can be seen as a trustful partner and may be invited to participate in a demanding paint job where the latest knowledge and techniques are required.

With kind regards
