Maritime style interiors – imitations of masts against a glazed panorama background.

The interiors of the luxurious 5-star hotel on the shore of the Baltic Sea arouse admiration with their discrete elegance and unconventional solutions.

The commission for FAST SA covered equipping 231 rooms and apartments with “hard” and upholstered furniture, and with lighting and necessary equipment, such as telephones and bathroom accessories. The company also undertook to arrange the public areas, including amongst others: the

reception area, restaurant, bar, café, conference rooms, SPA and changing rooms.

“The project fascinated us for several reasons. It required the use of innovative solutions and unique materials which could reconcile the designer’s vision with structural integrity. We looked for cutting-edge concepts which would harmoniously combine the modernity and comfort of the interior with the gorgeous view of the open sea.

The organization of such a large-scale operation was also quite a challenge: determining satisfying solutions when the Client’s wishes confronted the construction process realities, translating them into the contractor’s language and coordinating particular phases.

I still feel the impression of the project itself and the impetus with which it was implemented,” says Jacek Szczutowski, Project Manager at FAST SA.
