*Distinctive reception with mirror-effect*

We finished the works concerning the outfitting of hotel rooms for Ibis Styles in Wrocław. We value quality, sublime style, and individuality of our clients. Therefore, when implementing the ideas of individual clients, we pay attention to every detail of the concept. The concepts are analysed in a broad perspective in order not to violate their originality even in the smallest degree.

The hotel was designed by renowned local design office and it's interiors are related to *Alice's Adventures in Wonderland*.

The project leitmotiv determined fairytale design. A complete range of remarkable details warrants the use of specific technologies and unusual finishing methods. Key-shaped desk leg, colourful quilted armchairs inspired by queen's collar, and those cup-shaped, miniature doors, walls full of mirror frames and the restaurant with tables on the ceiling definitely are not standards in hotel's interior outfitting.

It was a huge challenge to match the demands of this ambitious project with limited budget, like it happens

with investments of 3-stars hotels. Everything looks like the project was fulfilled in an absolutely perfect way. Loyal cooperation always means for us joint effort and focus on expected target achieving. The mentioned fruition is now indicated by ACCOR group as one of three existing source patterns, representing the idea of the brand – Ibis Styles worldwide.
