Reception

FAST finished project of comprehensive interiors outfitting of clinic and hospital section of Medicus Clinic - Lower Silesian Laryngology Center in Wrocław. FAST scope of work included manufacturing and installation of furniture and wooden wall housings. Interiors were designed by renowned architectural office JSK - department in Wrocław. The project was very interesting, however also very demanding during implementation - the challenges were cylindrical furniture lumps and

curvilinear walls, requiring finishing with wood-based materials. The special attention draws reception in the shape of ovoid form cut with horizontal wooden planes. All furniture elements are made from premium quality materials, so that esthetical aspects go hand in hand with strict requirements concerning purpose of the facility. FAST equipped altogether 4 floors - starting from -1 level up to 2 level.
