

Park Plaza Hotel, Nurnberg

Stylish dining room

FAST completed the subsequent project of foreign hotels outfitting – four-star Park Plaza in Nurnberg, first one comprehensively outfitted for this network. The hotel successfully combines business elegance with familiar atmosphere which fosters relax. Due to its very attractive position in the closest neighbourhood of railway station, old town and popular shopping centre, Park Plaza is one of most visited hotels in Nurnberg. FAST scope of work in-

cluded outfitting of all hotel rooms and public spaces – lobby, reception, restaurant, conference rooms, library and toilets. In public spaces were used bended corizon and kerrock elements. The hotel was established in old, adapted building, almost all furniture were produced strictly for each room dimensions, what made the project very challenging, both technically and organisationally. Furniture were partly assembled during building and renovating works,

what further complicated the venture. The project was conducted by 4 constructors at the same time and was supervised by international PM group what resulted with mixture of miscellaneous work standards. For sure it was the project with the most frequently upgraded schedule – says Wojciech Kosmala, FAST Project Manager. - Obviously finally everything was perfectly buttoned up and resulted with excellent references – he adds.
