

Ibis Styles Białystok

Conference room

We finished the project of comprehensive outfitting of Ibis Styles Hotel in Białystok. This is successive object of the brand furnished by our company. Ibis Styles hotels are characterised by unique design and decorations

focused on one main theme in each. In Białystok the inspiration for architects was nature of Podlasie, mainly many species of birds living in the region. Hotel architecture is based on forms and structures observed in natural environment,

for example bird boxes, nests, plant motifs and bird silhouettes – the nature infiltrates the hotel areas and gives them calming, positive atmosphere. The FAST scope of work included rooms and all public spaces outfitting.
